## Successful Farming is the Backbone of Business

Farming is a business requiring study, foresight, common-sense and close application.

The Farmer requires a banking connection for the same as other business men. For this reason we invite the Farmer to open an account with this bank.

You can rely on our statement of assets and liabilities and receive the same consideration in the handling of your account as we extend to other business.

**THE BANK OF TORONTO**

We congratulate some of the citizens of Carbon on their efforts to organize a Brass Band in this village. All music lovers will appreciate this, and we consider a Band a distinct asset to any community.

We trust that the organizers will get all the support they need, and that this venture will prove a success.

We are sorry to hear that Mr. J. W. Baird is on the sick list and we hope that he will soon recover.

Nightingale beat Calgary Vets. this week by 2 to 1. This looks good for the Carbon Football Club as they beat Nightingale last week, pretty comfortable.

**Opportunity to Join the  
Drumheller Hospital  
District.**

To the residents of Township 29 Range 22 North of the Knee Hill creek and all of Township 29 Range 23, including the village of Carbon, an opportunity will be given on Tuesday Aug. 8th to be included in the Drumheller Hospital District and to obtain the benefits thereof.

On that date a vote will be taken at the Municipal Hall, Carbon. Poll open from 9 o'clock a. m. until 5 o'clock p. m. on whether the people of the area described above desire to be affiliated with the Drumheller Hospital district.

The Drumheller Hospital is a large, well equipped up-to-date Hospital and has given the best service during the years it has been running.

It behooves those interested to take full advantage of this opportunity, and not neglect to register their vote.

All residents of Township 29, Range 22 North of the Knee Hill creek and all of Township 29 Range 23 including the village of Carbon, are requested to register their vote on Aug. 8th at the Municipal Hall, Carbon.

Mr. A. D. McCannel of the Hospital Organization Branch and some members of the Drumheller Hospital Board will address a public meeting in Carbon, giving information regarding the Drumheller hospital on Thursday Aug. 3rd.

## Soldier's Settlement News

Mr and Mrs. Harold Olsen have returned again to their place after spending several months in Calgary.

Miss Bagley of Calgary is out for a few weeks visiting with her parents.

Mr Archie McKinnon left on Wednesday for the East having received a telegram that his mother was very ill.

Mr Pete Nielson was seen along our streets taking home a threshing machine, good luck to Pete.

The telephone men have been getting busy this week in our vicinity which will mean a great improvement to this part of the country.

### Let The Healthy Come

Observant men who are willing to face facts squarely, and who are willing to admit what those facts disclose regardless whether they support or deny their own preconceived ideas, and support or run counter to their own particular and possibly selfish interests, have long since reached the conclusion that a country of Canada's magnitude, and variety and extent of natural resources in a raw state, must obtain a large increase in population if those resources are to be developed, if people now resident in Canada are to secure some relief from present handicaps and burdens, and if that measure of prosperity to which the Dominion is entitled is to be achieved.

But when it comes to deciding upon policies by which the needed additional population is to be secured there is wide divergence of opinion. It is generally admitted that additional population must be obtained through immigration, although there are some few people who would limit immigration to the few who might come quite unsolicited to this country and who would, therefore, have the Federal Government discontinue all efforts to obtain immigrants.

Others, and a fairly large number, too, would restrict all immigration to people coming from the United States and Great Britain. These good people are ever fearful that Canada will be swamped by a horde of alien peoples, speaking various languages, and bringing to this country the superstitions, the hatreds, the national customs and manners of living of their native lands, with the result that the Canada of the future will be a nation of polyglot peoples with little in common, but with much that may make for disunion and discord.

Such people overlook, or ignore, one important factor in nation building, while they greatly exaggerate the extent of the menace they profess to so greatly fear. In the first place, it is important to recognize the fact that in the development of a new country like Canada all kinds and classes of labor are required. Work cannot be provided for the skilled artisan in factories until, first of all, the rough labor of the untutored, unskilled worker has been brought to bear upon the raw soil and materials with which this country abounds. Before a factory can give employment to the skilled worker, excavations must be dug, sewers constructed, railways and roads built, trees felled and sawn into lumber, coal mined, and numerous other odd jobs performed. The average immigrant from the United States and Great Britain does not come to Canada to engage in this rough work. He and his family come with the idea of bettering their condition in life. If called upon to do this rough, heavy work here such immigrant becomes discouraged and soon leaves the country.

On the other hand men willing to do this kind of work, and looking for it, can be obtained in other countries and it would amount to national suicide to prohibit their entry into Canada through a mistaken, shortsighted idea of keeping Canada solely the birthright of English-speaking peoples. Western Canada would not enjoy the railway facilities it now possesses, nor would the Prairie Provinces boast of its present fine cities and towns had it not been for the rough, unskilled work of the very class of people who would now, if some good people had their way, be barred from entry into this Dominion.

Nor is there any real danger of Canada being flooded with "foreigners" to such an extent as to jeopardize our British institutions and Canadian ideals. The United States became convinced that Europeans had to be kept from pouring into that country as the land of promise, with the result that a law was passed limiting the number of people of any race who might enter the States to three per cent. of the number of such race already domiciled there. In the first year of the operation of this law it has been discovered from the official figures that in the case of one country only did the full number eligible to enter come to the States. That country was Poland. On the other hand more people left the States to return to Poland than came from there, the net result being a loss of Polish population to the United States. In like manner more people returned to Italy and Greece than came from those countries, while in the case of all other European countries, fewer immigrants came to the States than would have been allowed to enter under the new law.

It would appear, therefore, that there is no such great rush of Europeans to this continent, and that the danger of flooding this country with "foreigners" is more imaginary than real.

Canada needs population. That need is manifest on every hand. It should, therefore, be Canada's national policy to admit any white people who want to come to our open areas and to work in the development of our natural resources, provided—and this is the only provision that should be rigidly enforced—they pass strict medical examination and are shown to hold a clear bill of health and give ordinary proof of good moral character. We should rigidly exclude mental, moral and physical defectives. Having done this, few other precautions are necessary, and it is safe to say that out of the enterprising ones who migrate to Canada—and it is the more enterprising who do immigrate—the greatest proportion will make good.

### BEAUTY OF THE SKIN

is the natural desire of every woman, and is obtainable by the use of Dr. Chase's Ointment. Pimples, blackheads, roughness and redness of the skin, irritation and eczema disappear, and the skin is left soft, smooth and velvety. All dealers, or Edmanston, Bates & Co., Limited, Toronto. Sample free if you mention this paper.

### A Cruise on the Great Lakes

Enjoy to the Fullest Extent the Trip East

The trip to Eastern Canada or the United States can be made doubly enjoyable by including the delightful cruise on the Great Lakes from Port William and Port Arthur to Port McNicoll or Owen Sound on the Palatial Canadian Pacific Steamers "Kewatin," "Assiniboia," and "Manitoba." Three sailings a week from Port William and Port Arthur every Wednesday and Saturday to Port McNicoll, where direct connection is made with special train for Toronto, and every Thursday for Owen Sound. The Great Lakes trip is a delightful diversion to the East—Restful, cool and refreshing.

The Ticket Agent of the Canadian Pacific will be pleased to give full information as to rates, sailings, etc., and arrange every detail for an enjoyable trip.

Minard's Liniment for Dandruff

### Plans to Reduce European Armies

Lord Esher Makes Proposal to Reduce Armies to Reasonable Limits

Plans for the limitation of European armies were submitted to the Disarmament Commission of the League of Nations by Lord Esher of England.

Lord Esher's scheme proposed that the armies be trimmed to the following figures: France, 180,000; Poland and Italy, 120,000; Great Britain, Greece, Rumania, Jugo-Slavia, Spain and Czecho-Slovakia, 90,000; and Belgium and Switzerland, 60,000.

His proposal was to apportion armies according to a unit plan. He suggested that 30,000 men comprise a unit, which would bring the armies of European powers to the figures named above.

Installation of an international staff at Geneva to study the plan, and to oversee its operation if decisive action is taken, was also proposed.

Admiral Segrave, Great Britain, submitted a proposal that the naval disarmament treaty be extended to the nations other than those who attended the Washington arms conference.

### His Flesh Horribly Burnt

His druggist sold him a cheap Acid corn remedy. Instead of giving him good old reliable Putnam's Corn Extractor which has been for fifty years the Standard remover of corns and warts. "Putnam's" never fails, it is always a success. 25c everywhere. Refuse a substitute.

### Puzzled

"I beg your pardon," said the lady collector timidly, "would you please help the Working Girls' Home?"

"Certainly," said the man, "but where are they?"

### WORRIED WOMEN

### NEED RICH BLOOD

If the Blood is Not Kept Pure Health Will Break Down

It is useless to tell a hard working woman to take life easily and not to worry. To do so is to ask the almost impossible. But, at the same time, it is the duty of every woman to save her strength to meet any unusual demands. It is a duty she owes herself and family, for her future health may depend upon it.

To guard against a complete breakdown in health the blood must be kept rich, red and pure. No other medicine does this so well as Dr. Williams' Pink Pills. This medicine strengthens the nerves, restores the appetite and keeps every organ healthily toned up. Women cannot always rest when they should, but they can keep their strength by the occasional use of Dr. Williams' Pink Pills. Among those who have found benefit from this medicine is Mrs. Cora Conrad, Broad Cove, N.S., who says: "My system was very much run down, and my blood poor and watery. I suffered a great deal from headaches and dizziness; my appetite was poor, and I tired easily. I decided to try Dr. Williams' Pink Pills and have every reason to be glad that I did so. Soon I felt better, and under the continued use of the pills the headaches and dizziness were gone, and my blood seemed in a better condition than before. For this reason I recommend Dr. Williams' Pink Pills."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

There is enough iron in the blood of forty-two men to make a ploughshare weighing twenty-four pounds.

### Husband and Wife Nearly Dead With CHOLERA

The chief symptoms of cholera are vomiting, and purgings occur either simultaneously or alternately, and are usually sudden and very violent, and the matter ejected from the stomach has a bilious appearance and a nasty bitter taste.

On the first symptoms appearing, Dr. Fowler's Extract of Wild Strawberry should be taken, and the trouble checked before it becomes serious.

Mrs. Isaac Smith, Campbellton, N.B., writes:—"We have been using Dr. Fowler's Extract of Wild Strawberry for cholera. My husband and I were pretty nearly dead with it until we started to use your medicine, and thanks to it, we have found great relief, and are recommending it to all our friends."

77 years' reputation stands behind "Dr. Fowler's," therefore you are not experimenting with some new and untried remedy when you get it.

Price, 50c bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

### Ontario's Giant Seaplane

Government Forest Service has Finest Aircraft on Continent

The Ontario Government Forest Service, which has inaugurated at its own expense a special aerial patrol this year, will have in commission the largest and finest aircraft that has yet been seen on this continent. This machine, a Vickers "Viking" amphibian, arrived recently from England. The "Viking" to be used by the Ontario Government is identical with the machine that won first prize of 10,000 pounds sterling in the British Air Ministry tests of September last year. Operations will be centred at Remi Lake, under Captain W. R. Maxwell, who some weeks ago performed a very unique feat of flying to Moose Factory in an aeroplane equipped with skis.

It is understood that the Ontario Department of Lands and Forests contemplates making a detailed inventory of the forest resources of the province by means of this most modern method of forest survey. Special aerial cameras will be employed in the work. The wing spread of the "Viking" is 46 feet. The motor, which is a Napier-Lion, develops 450 horsepower. The range at full speed at 6,000 feet is 350 miles, while at a cruising speed of 90 miles per hour the "Viking" can travel 480 miles.

### Possibilities Of Commercial Aviation

French Airmen's Average Speed Was 122 Miles an Hour

A feat which demonstrates the wonderful possibilities of commercial aviation has just been accomplished by two French airmen, Lieutenants Batteller and Carrier.

They agreed to race against each other from Paris to Marseilles and back by aeroplane, the loser to offer the winner a glass of port.

Lieutenant Carrier was in the air nine hours and five minutes, or an average speed of eighty-two miles an hour.

Lieutenant Batteller, however, did even better. His time was 7h. 45m., or an average speed of 122 miles an hour.

By train the return journey, Paris-Marseilles-Paris, takes twenty-six hours.

**Drives Asthma Like Magic.** The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor, reaching the most remote passage of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

### Canada Exports in Cars

Canada is continually ranking higher as a source of purchase of motor cars by Great Britain. During the first quarter of 1922 the Dominion ranked first as a source for the number of finished cars and fourth with respect to chassis, in the British motor car imports. France ranked second with regard to both finished cars and chassis. Italy was third for finished cars and first for chassis, while the United States was fourth in finished cars and third in chassis.

### Minard's Liniment Relieves Neuralgia

### Reclaimed Land

According to the Irrigation and Drainage Commissioner for Alberta, the work of drainage in Alberta is practically completed and a good portion of the 13,000 acres of land reclaimed is already being put under cultivation. This is the result of the Holden drainage system. The Daysland drainage scheme in which 16,000 acres will be involved is now in process of construction and work will be carried on through the summer, with a likelihood of getting it nearly or wholly completed this year.

**Excellent for Croupy Children.** When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

An indirect lightning fixture of a Milwaukee theatre weighs 5,500 pounds.

Minard's Liniment for sale everywhere.

**JAMES P. HUMPHREYS**, well-known automobile man of Hebron, Md., who declares he believes Tanlac is the best thing to overcome stomach trouble and run down condition. States it completely restored his health.

"I believe in giving everything its due and I want to say right now I just can't praise Tanlac too highly for what it has done in my case," declared James P. Humphreys, proprietor of the Hebron Motor Co., Hebron, Md.

"For three years or more I suffered from indigestion. After eating I would bloat terribly with gas and my heart would palpitate until it interfered with my breathing. I was habitually constipated and my nerves were all upset. My sleep was unsound, I got up mornings all tired out, and I was only a shadow of my former self."

"Well, Tanlac has given me a keen appetite, stomach trouble has disappeared, my nerves have steadied down, and I have gained several pounds. Tanlac, to my mind, is the best thing ever sold for stomach trouble and run down condition."

Tanlac is sold by all good druggists.

### Times Have Changed

It used to be perfectly proper for a young man to offer his seat in the street car to the strange but beautiful young woman, but he's taking chances nowadays on being arrested as a masquerader if he stops his automobile at the street corner and offers to give the strange but beautiful young woman a ride.—Detroit Free Press.

**IT HELPS**  
Coughs, colds, chronic indigestion and Constipation are simply due to a catarrhal condition of the mucous membranes. The way to get rid of these troubles is to take something which will rid the system of catarrh.

## Cattle Embargo Question Is Again Discussed By House Of Lords

London.—Members of the House of Lords mustered in fair numbers for the debate on the proposal to remove the embargo on Canadian store cattle. A few Canadians were present, but the general spectacle in the upper chamber failed to give the impression that the subject under discussion was one of momentous importance to the Empire.

Lord Ernie, a former minister of agriculture, admitted that undoubtedly a pledge had been given at the Imperial War Conference in 1917, but it was not a definite pledge to reverse the domestic policy of exclusion, but rather a compromise contingent upon a change in agricultural circumstances, the scope and meaning of which must be regarded with the context of changed time and circumstances. What he pledged himself at the conference was, so far as the machinery of the Government's policy was concerned, the withdrawal of allegations of disease among Canadian cattle and the admitting to full doubtfulness of the original case for exclusion.

Lord Ernie maintained his explanation given in correspondence to the press some time ago, declaring that had he remained minister of agriculture, he would have done his best to institute a policy for the limited admission of cattle, adding that he probably would have failed and resigned.

Lord Birkenhead, the Lord Chancellor, declared that he was still unable to understand Lord Ernie's position. He held that a pledge had been given and would adhere to it.

The Duke of Devonshire said there was no danger whatever in the free admission of Canadian cattle. He thought there was not the slightest doubt that Sir Robert Borden had returned to Canada believing that a bona fide pledge had been given that legislation would be enacted to remove the restriction. The removal would have a marked effect in Canada's export trade to other countries, which are apt to point to the embargo when the Dominion desires to export cattle. The changes in the United States tariff made it essential that Canada should open new markets. The development of mixed farming, if encouraged, meant that there would be a big demand from Canada for the highest class of stock.

Lord Long, as Colonial Secretary and Chairman of the 1917 Conference, maintained that an absolute and complete pledge was given. He thought that a month's quarantine would be a reasonable safeguard and he thought this would be acceptable to Canada.

The debate was adjourned for two weeks. This was done with a view to passing a resolution, which was moved by Lord Harris, that the House accept the Finlay commission's conclusions that Canadian cattle were free from pleuro-pneumonia and might be admitted subject to quarantine precautions.

**Powerful Medicine.**—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

### Killed by Train

Woodstock, Ont.—Cecil Young, 21, both deaf and dumb, was instantly killed when he walked into the path of a freight train at a level crossing.

### Reichstag Fixes Amount of Loan

Berlin.—The Reichstag taxation committee has fixed the amount of the compulsory loan at 70 billion marks. The entire proceeds will be used to cover deliveries in kind to the Allies.

**MUSHROOMS PAY**  
Men wanted to grow mushrooms for us; any intelligent man can do this work and make from \$25 per week upwards in spare time; illustrated booklet sent on receipt of 3c stamp. Toronto Supply Co., Cumstock Bldg., Toronto.

W. N. U. 1429

## Conference on Russian Problems

Stormy Sessions Held at The Hague Widens Chasm Between Russia and Other Powers

The Hague.—A stormy session of the conference on Russian problems apparently ended all chance of an agreement between the Russians and the other powers.

The chasm between the Russians and the other powers apparently is wider than originally. The group is not divided as it was at Genoa. The British and French are acting now in agreement on the demands concerning naturalized property which the Russians say practically amounts to absolute restitution. This position was developed at the meeting this morning of the sub-commission on property, after which M. Litvinoff, head of the Soviets, stated emphatically he believed that the conference had exhausted its usefulness and would end without results. This afternoon the sub-commission on debts had equally unfavorable results. The Russians insisted on having the present conference fix the total amount of pre-war debts Russia would be expected to pay, but the non-Russians stood out for fixing the sum through mixed commissions at a later date.

M. Litvinoff granted an interview in which he declared that the non-Russian delegates had clearly agreed to make the conference a failure and were trying to pin the Russians down to answer questions in order to justify breaking up the meeting.

"We have had no reply to our repeated requests for definite statements regarding what credits we are to get for reconstruction," he said. "Instead of definite answers we get lectures on confidence and how to restore confidence. If we cannot get credits through the Governments we shall get private credits."

## Havoc Wrought by Shell

Eight Children in Watertown, N.Y., Were Blown to Pieces

Watertown, N.Y.—Eight children, ranging in age from six to eleven years, were blown to pieces by the explosion of a 75-millimeter shell on the back porch of a house in Dimmick Street, occupied by Edward G. Workman and Wm. L. Salisbury.

The shell, which was owned by Mr. Workman, was one which he had kept as a souvenir and used on the porch to keep the door from closing. It was thought to be "dead."

The children were playing croquet in the back yard. The shell is believed to have either been set off by the hot sun or to have been struck by one of the victims with a croquet mallet. Windows within a radius of two blocks of the explosion were shattered.

## Activity in Lumber Camps

Boom in Building is Causing Shortage of Lumber Supplies

Ottawa.—The present activity in building is causing some shortage in the wholesale lumber supply, with the result that camps will be in very active operation during the coming season. Companies which have not been in operation during the past two years will be starting up again.

According to the Dominion Livestock Branch, the activity in the lumber camps is also expected to have a very beneficial effect on the horse market.

### Missouri Wreck Kills Five

Kansas City, Mo.—Five persons were killed and 40 injured, most of them seriously, when the Missouri Pacific Scenic Flier, westbound from St. Louis to California, collided head-on with a local freight train near here.

### Legless Man Good Swimmer

Sudbury.—Although he lost both legs in an accident some years ago, George Coombs, of Sudbury, won second prize in the quarter-mile swimming race at the regatta here.

## WESTERN EDITORS

Thos. J. Collins, Editor and Proprietor of The Observer, Holland, Man.

## Moslem Leader Acquitted

Sentenced May 4 to Two Years Imprisonment for Sedition

Ahmedabad, British India.—Hazrat Mohani, President of the All-India Moslem League, has been acquitted by the high court on a charge of inciting war.

Mohani was sentenced to two years imprisonment on May 4 for sedition after the judge had refused to accept a unanimous verdict of not guilty, rendered by a jury which included five Indians. In a speech before the All-Indian Moslem League last December he was alleged to have advocated guerilla warfare to bring about establishment of a republic, which would be called the United States of India.

## B.C. Losses From Forest Fires Heavy

Over 60,000,000 Feet of Green Wood Destroyed in June

Vancouver, B.C.—More than 60,000,000 feet of green timber, alone valued at approximately \$200,000, has been destroyed by forest fires during the last month. During the last few weeks between 30 and 40 thousand acres have been swept by fire. At Grassy Bay, 150 miles northwest of Vancouver, fire has destroyed 5,000,000 feet of standing fir and cedar.

It is the worst season from the viewpoint of fire loss that the coast district has experienced for many years.

### Body Turned to Stone

Pittsfield, Mass.—James Burke, 37, whose body for nine years had been slowly turning to stone, died recently in the Mother Margaret Mary home in Cheshire.

Nine years ago, while holding a clerical position in the Panama Canal zone, he became infected from an insect bite; his bones started to stiffen and the process of ossification was under way.

While suffering much discomfort he had little pain and always was cheerful.

## Germany Maintains That Country Unable To Meet Cash Payments

### Premier at Washington

New Canada-United States Boundary Treaty is Proposed

Washington.—A proposal that the century-old agreement between the United States and Canada regarding the military and naval defences maintained on the international boundary be revised in permanent form and in line with the agreements reached at the Washington conference was the chief mission here of Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, who is conferring with Secretary Hughes. A new treaty modernizing the Rush-Bagot agreement probably will be negotiated between the two countries.

## Montreal Port Breaks Record

Grain Cargoes to July 9 Totalled 500,000 Bushels More than 1921

Montreal.—That the port of Montreal is not only equalizing but even exceeding the record grain shipments of last year was shown by figures supplied by the Grain Clearance Board. From the opening of navigation to the evening of Sunday, July 9, these totalled 39,608,162 bushels and against 39,126,918 for the same period 1921. Last year's total output from Montreal amounted to 138,453,980 bushels, nearly fifty millions more than from any other port on the North American continent.

## British Mission Will Tour Canada

Object is to Secure Entries for Empire Exhibition

Ottawa.—The Government has received a communication from Right Hon. Winston Churchill, Secretary of State for the colonies, intimating that a mission will visit Canada next month in connection with the organization of the proposed British Empire Exhibition.

In view of the Imperial nature of the work which the mission is setting out to accomplish, the Dominion Government has agreed to grant free transportation over the lines under its control to the seven members of the mission.

The object of the mission in coming to Canada is to induce the Canadian Government to take part in the proposed British Empire Exhibition.

### No Invitation Received

Paris.—A meeting between Premier Lloyd George and Prime Minister Poincare for discussion of the reparations situation is being discussed in official circles here, but it was said at the foreign office that no invitation had been received from the British premier for such a conference.

Paris.—Germany served notice on the Allied powers through the Reparations Commission that she could no longer meet cash obligations of any sort, whether growing out of the Versailles treaty stipulations undertaken by acceptance of the London ultimatum of May 5, 1921, or arranged by the schedule of payments drawn up by the Reparations Commission on March 21, 1922.

The depreciation of the mark on foreign exchanges is given as the reason for the possibility of Germany to pay and for her request that she be relieved of cash engagements, including the payment of 32,000,000 gold marks, as well as all subsequent payments in 1922, 1923 and 1924.

The German note submitted to the reparations commission makes no mention of Germany's intention regarding cash payments after 1924, but asks that the negotiations for a foreign loan interrupted at Paris last month, which Germany blames for the continued fall of the mark, be resumed at an early date, or a financial, economic and social catastrophe in Germany would be likely to develop.

The Germans asked to be relieved of payment on the ground that the money was badly needed to pay for foreign cereals soon to be purchased in order to insure enough bread for the people.

In the note, Germany points out that in May, 1921, the rate of 60 paper marks to the dollar formed the basis of fulfillment of reparations payment, while, on July 6 last, the mark had declined to 500 for the dollar. In order to effect the payment of 720,000,000 gold marks during this year the sum of 80 billion paper marks would be necessary with the mark at its present value.

The note concludes: "The recent development in the rate of exchange of the mark, which began with the adjournment of the negotiations of the loan commission, necessitates a speedy provisional settlement, the relief payment expected from a foreign loan not having been released. In consideration of the above, the German Government would be glad if the commission would make its decision as to demands for respite with all possible speed. The German Government trusts that such decision will favor the resumption of the loan negotiations."

## Great Lakes Cruise

Pleasant Break in Journey to Eastern Canada Going by Lake and Rail

Travellers to Eastern Canada will find the Great Lakes tour a delightful break in a comparatively long journey.

The freedom, the clean cool comfort, the fun on shipboard, the concerts, promenades and dances, the excellent meals, appeal to all who travel on the palatial steamers "Huronic," "Hamonie" and "Huronie," that sail from Port Arthur, Saturdays, Mondays and Wednesdays. You will enjoy the sail down beautiful St. Mary's River, the thrill of passing through the "Soo" locks, and a delightful and restful trip across Lakes Superior and Huron. The fare by lake and rail to Toronto and points East is exactly the same as by all rail. The cost of meals and berth on steamer however, is particularly low. Just \$19.00 one way. Any Canadian National Grand Trunk Ticket Agent will give you all particulars.

## Britain Will Not Change Naval Policy

Government Has No Intention of Building Capital Ships

London.—Baron Lee, First Lord of the Admiralty, answering a question in the House of Lords, declared there had been no new developments in connection with air or submarine attacks which necessitated a reversal of the British naval policy. Therefore the Government had not reconsidered and did not intend to reconsider the policy providing for the building of two capital ships.

# Scientists Believe That It Will Be Possible To Produce A Cold Light

"Human glowworms" are found now and then, according to biologists engaged in the search for "cold light" from animal sources. These animal sources may be the chief commercial light of the future, as Charles P. Steinmetz sees it.

In the opinion of some students of the subject, the light given off by certain insects and vegetation in the darkness is not caused by any lighting system of their own, but to a bacterial infection. Even the glowworm, according to a German study, just issued by Professor P. Buchner, does not furnish his own illuminant, but merely provides in his body a suitable home for billions of light-producing bacteria. The complex illuminating equipment found in many fish and crustaceans is held by Buchner to be merely elaborate schemes for furnishing nutriment for the bacteria to live upon, and oxygen, by which the light is produced.

The study has yielded a long catalogue of animals and vegetables that produce their own "cold light." The study also has caused some unlearning. To the layman one of the most familiar objects which shine in the dark by their own light is the eyes of cats and other animals. This is not the case at all, according to Dr. Harvey. The cat has no internal source of light, but his eye is a wonderful reflector and will gleam when it is almost dark. When it is totally dark the eye of a cat is dead. A few living things, less familiar than cats, however, have a lighting apparatus of their own.

Some of the things which will glow in the dark, whether by their own light or by light borrowed from bacteria, are, according to Dr. Harvey's catalogue, certain lichens, algae, fungi, yeasts, molds, smuts, mushrooms, puffballs, mosses, liverworts, ferns, flowering plants, jellyfish, sponges, sea anemones, many tribes of worms, starfish, periwinkles, slugs, squids, frogs, toads, salamanders, snakes, lizards, turtles, many deep-sea animals and various kinds of eggs. Some members of all those families are self-luminous.

Dr. Harvey searched for many years for sources of animal light in which the light-producing substance was sufficiently concentrated for experimental purposes. He found by far the best agent in the cypridina, a minute shellfish, which are thick in the sea around Japan and are supplied to him by a Japanese fisherman.

There seems to be only one practical commercial use for luminous bacteria at present and that is in detecting fine cracks in filters. When liquor highly colonized with luminous bacteria is placed in the filter and the filter is carried into a dark room, a glowing will mark the place of the leak.

Dr. Harvey has produced a light from the cypridina by which it is possible to read a newspaper at three to four feet in an otherwise dark room. If this is further developed, as expected, the next step will be a light strong enough to be of value in such use as the handling of explosives or for the illumination of atmospheres in an explosive state from dust or gas. In twenty years, according to Dr. Steinmetz, it is possible that every home will be lighted in this way. The cypridina exists in enormous quantities in the ocean and might be collected in numbers sufficient to illuminate the world, it is said. At the same time, Dr. Harvey and others are seeking to build up artificially the substances which produce light. Some day it may be manufactured on a large scale. Once the secret of nature is discovered, an attempt will be made to produce a far more intense light. The value of a light of this kind would be its economy. The substance which produces the light, a minute shrimp-like creature, would be cheap enough. Fresh coal has to be burned continuously to produce electricity for electric light, but the natural lighting substance could be used over and over again. The process by which it can be used in this way is the thing discovered by Dr. Harvey. The nature of the lighting substance itself has been studied for many years.

The natural chemical process of

"temporary, cold light" production involves three factors. Dr. Harvey added a fourth factor which produces "continuous cold light."

The lighting substance itself is a protein called luciferin. It combines with oxygen to cause light. The third natural factor is called the luciferase and is an albumen combined with some heavy metals such as iron, copper or magnesium, as it has been worked out by Dr. Harvey and Dr. A. H. Phillips of Princeton.

The function of the luciferase is to assist the union of luciferin and oxygen, making them combine rapidly enough to produce light in the process. The fourth factor discovered by Dr. Harvey is a metallic agent which disunites the oxygen and the luciferin as fast as the luciferase causes them to unite.

The luciferase might be compared to the wick which assists a candle to burn. The tallow would play the same part in the burning of a candle as in producing cold light.

The fourth factor enables the light-producing chemical combinations to be repeated over and over again, but not perpetually, as the process would eventually slow down. Recharging of a luciferin lamp, however, would only be necessary at long intervals.—New York Times.

## Picture Books for the Sightless

Pictures Can Now Be Used By Blind Folks

The splendid work done for the blind keeps expanding in new directions. The latest developments is a picture book for the sightless.

By the use of embossed dots, after the manner of books read by the blind, any picture can now be produced in such a way that the trained blind man can read it by finger-touch just as clearly as those who have eye-sight can read it from the level page.

Of course, understanding does not come as swiftly and broadly by touch as by sight, but it extends to practically every detail that can be expressed in form. Architecture and natural history are particularly suitable for reading by touch, and a book of travel pictures for the fingertips has now been prepared.

Among the erections pictured in this book for the blind, exhibited at the Printing Exhibition at the Agriculture Hall, Islington, England, were Eleanor's Cross in front of Charing Cross Station in London, the Rialto Bridge in Venice, the Leaning Tower of Pisa, and the Great Wall of China.

The aim of the instructors of the blind, to enable them to live the life lived by those who have sight and to enjoy similar pleasures of all kinds, is being more fully attained as every year passes, and the addition of pictures to the store of pleasures the blind may enjoy is one of the greatest of the victories won.

## The Cultivation of Wheat

Varieties Grown in Different Climates Have Separate Ancestor

For 15,000 years man has cultivated certain forms of wheat. A scientist has just been talking about it.

Some of the oldest-known forms are still cultivated in parts of the world. All wheats were originally wild grasses. If our wheat is left to itself, allowed to seed as wild grasses do, it soon goes back to the form from which it sprang.

The different kinds of wheat grown in different climates have each had a separate ancestor. In some cases their ancestry has not been traced; the wild plant which became the cultivated foodstuff has not been identified.

Until the Spaniards went to America wheat was unknown there. It took to the soil readily, and in time America became one of the greatest of the wheat-producing countries.

## Canadian Eggs for New Zealand

The first consignment of fresh eggs, amounting to 1,200 dozen, ever sent by British Columbia to New Zealand left Victoria recently on board the steamer Makura. If the shipment receives a good reception, it is expected that a considerable trade with the distant Dominion will be developed.

## Woman's Rights in Finland

Fair Sex Enjoy Almost Equal Rights With Men

Woman in Finland enjoys almost equal rights with the man. In school she has, in the common instruction with the male youth, opportunity to contend with them and to acquire the same knowledge. After completing the school education, almost all vocations are open to her, and she is found in all branches of industry, but especially in business houses, in public offices and similar institutions. She cannot occupy the office of minister, however, and some of the higher posts. Practically, woman is the equal of man. She has the right of suffrage and she herself is eligible to all elective offices. The Finnish Diet actually counts twenty female deputies among its members.

## British Hotel Clerk's Error

Was Under Impression Canada Belonged to United States

"Canada," which is published in London, Eng., produces an interesting narrative in a recent issue. It reads thus: "A lady informed the hotel clerk of a certain hotel in the provinces that she was a Canadian. Imagine her surprise when she found herself registered as an alien. This, because the hotel clerk was under the impression that Canada belonged to the U.S.A. Is it not incredible? And to think that elementary education has been compulsory in England for nearly 50 years, and for that education British people are paying about £10,000,000 per annum! Obviously, the nation is not getting value for the money spent in elementary education."—Victoria Times.

## Developing Electrical Energy

Two hundred thousand horsepower of electrical energy are being added to Canada's supply each year, according to J. C. Smith, president of the Canadian Electrical Association. This means a capitalization of \$40,000,000 a year. Half of this is in Ontario.

## To Study Canadian Trade Prospects

A special representative of Vickers, Limited, London, England, is now in Canada making a study of the field for manufacturing and trade purpose. It is understood that he will visit all sections of the Dominion.

# The Old Problem Of Rural Depopulation And City Unemployment

## To Pilot Polar Aeroplane

Canadian Aviator With Amundsen on North Pole Trip

Captain Roald Amundsen, Norwegian explorer, sailed from Nome, Alaska, on the first lap of his trip on which he hopes to cross the North Pole in an aeroplane. The explorer sailed for Point Barrow, where he will take off on the aerial part of his journey. He plans to land at Spitzbergen or on Cape Columbia, Northern Greenland.

With the Norwegian explorer sailed Elmer G. Fullerton, Canadian member of the British Royal Air Force, who will pilot the 185-horsepower Junker monoplane in its flight.

From now on the only communication Amundsen will have will be by the powerful radio apparatus on the Maud.

Every citizen of Nome turned out for the departure. For 48 hours mushers with dog sleds had been arriving to pay honor to the explorer. Mayor George S. Maynard declared a holiday, and a score of automobiles formed a procession. Amundsen was visibly affected.

Fullerton said: "Captain Amundsen and I hope to make a non-stop trip from Point Barrow across the world to Spitzbergen, taking about 24 hours for the journey. Our 185-horsepower Junker monoplane will carry 350 gallons of gas and is equipped with special skids for landing on ice."

Fullerton smiled when asked what his chances were for landing safely.

"It's either success or death for us," he said.

## Navigated by Electrical Signals

The Royal Mail liner Orbita was successfully navigated through a narrow channel leading to Portsmouth Harbor by electrical signals from the admiralty's submarine cable, laid 20 miles out to sea with the object of lessening the fog peril near the harbor. The Orbita up to the present time is the only ship on which the necessary equipment has been installed.

Stella Has a Strange Visitor.

Do you know what a Manatee is? Mr. Manatee had traveled and traveled until at last he had come to the End-of-the-Earth. It had taken him twice as long to reach it as it would have taken anyone else because walking is quite the hardest thing that a Manatee can do; in fact, he can't really walk, as he has no feet! He can only shuffle and drag himself along over the ground by using his flapper tail and arm fins, which are the nearest things to feet that he can boast of and which have to serve him as such. Of course he was perfectly delighted to finally reach Stella, the Wishing Fairy, even though he had no wish, but merely wanted to see her, and after he had left her the four Brownies all crowded around her and wanted to hear all about everything concerning Manatees.

The Brownies are ever so curious. They simply hate to miss anything, and they had missed seeing Mr. Manatee—that is, all but Pimble, and he had had only a glimpse of him in the distance.

"He reminded me a bit of a Seal," the Brownie said, "at least, the little I saw of him did, and I thought him terribly ugly!"

"Well," and the Fairy laughed, "I can't say that good looks were very noticeable about him. Here, I'll draw a picture of him so that you'll know exactly what he looks like." And while Stella drew she told them that even though Mr. Manatee had had no wish to ask her to make come true she had waved her magic wand over him (for she can do anything with that star wand of her's) so that when he should want to start back for home he would suddenly find himself there and be spared the terrific effort of that long trip without any feet.

"For," she explained, "his fore limbs are flattened into fins, but the hind limbs are lacking altogether. In the water he is very much at home swimming, with his two fins and with his strong fan-shaped tail."

"What is his skin like?" Snookums asked curiously, as he looked at the picture.

"It is grayish black, and becomes quite black when wet, and it is covered with bristles."

"Do Manatees live in the deeper parts of the ocean, or where?" asked Kinkajou, "for we didn't swim across any during our trip under the sea."

"No," replied the Fairy; "they generally stay near the shore, especially around those places where rivers empty into the ocean, and they dearly love to swim far—ever so far, up the rivers, where they always keep close to the banks."

"Why?"

"So that they can easily get the water weeds and plants, for that is all they live on. They eat nothing else."

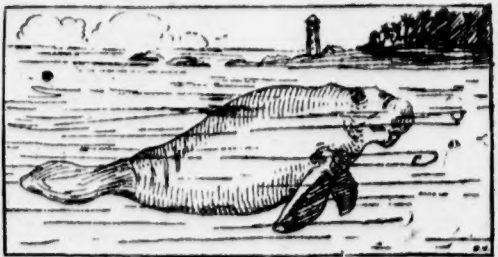

"How big are they?"

"Oh, from four to ten feet long. They have a pig-like snout, with nostrils at the end of it; but instead of being called 'Sea Pigs' they are—what do you suppose they are called?"

"Can't you guess," laughed Pimble. "Tell us."

"Sea Cows!" was the amazing answer.

Copyright, 1922

A recent number of the Farm and Ranch Review, Calgary, attacks with considerable vehemence the attitude of a large section of labor in connection with the unemployment situation.

The article in question, headed "Rural Depopulation and City Unemployment," states that many of those out of a job at the present time would rather gracefully starve than accept a position on a farm.

The words of the writer in this connection are:

"A labor exchange, which came to hand some time ago, contains an article condemning in eloquent and scathing terms our whole economic and social structure. 'Why,' indignantly exclaims the editor—are our streets lined with unemployed while millions of acres of the world's most fertile lands are lying idle on the broad plains of the western prairies? Why, indeed! It does seem ridiculous."

"But, bless your innocent, little heart, the explanation is perfectly obvious. The gentlemen who line our streets, ostensibly in search of employment, are seldom looking for any twelve-hour-a-day job. It is so much simpler to let some other fellow do that unpleasant task, while the canny city worker profits by the prosperity thus created, and organizes a strike to cut his own day to six or seven hours, so as to have lots of leisure for the movies. He is becoming the drone in our modern scheme of life. The farmer, the worker."

"No, we have quite another, and a much more serious, problem facing us in Canada—in the east, perhaps, more than in the west. The only thing that will drive the indolent, pleasure-loving city worker to the farm is fear of actual starvation. But how are we going to keep our own young, skilled men anchored to the farm? How are we going to compete with the lazy working programme and high wages of the city which is rapidly being developed into ridiculous and impossible lengths and is drawing away from our farms many of our most progressive and capable boys? Now, here is a real problem for some clever person to solve."

"Irresponsible lunatics have for years preached the doctrine of indolence and asserted that we could all make a good living working only four hours a day. Most of these apostles of leisure never tried to work even that number of hours. To them, idleness is synonymous with happiness, and honest work with grief and slavery. This poisonous gospel is getting a strangle hold of our urban workers, who today actually seem more concerned with reducing the hours of work than with increasing the hour rate of pay. The farmer must work long hours or fail. Until someone shows him how to curtail successfully his own hours, he is not going to regard the city workers' contentions with sympathy."

## Forecast of U.S. Crop

Report Says Crops Will Be Below Normal Point

This year's total United States wheat crop was forecast at 817,000,000 bushels and the corn crop at 2,860,000,000 bushels by the U.S. Department of Agriculture in its July crop report.

Winter wheat production was forecast at 569,000,000 bushels and the condition on July 1, was 77 per cent. of a normal crop. Spring wheat production was forecast at 248,000,000 bushels and the condition at 83.7 per cent.

All wheat condition was 78.9 per cent. of normal.

Production forecasts and details of other crops were announced as follows:

Oats—Production 1,137,000,000 bushels. Condition 74.4.

Barley — Production 182,000,000 bushels. Condition 82.6.

Rye — Production 82,000,000 bushels. Condition 89.9.

Every Japanese hotel has a fan, special in itself, containing a view of the hotel and a blessing from the writings of Confucius. One of these is always given to the departing guest.

## RICH IN VITAMINES

MAKE PERFECT BREAD

## WORLD HAPPENINGS BRIEFLY TOLD

Sidi Mohamed. En Nacur, the Bey of the regency of Tunis, Africa, died at the age of 67 years.

The Washington treaties bill, ratifying the pact signed at the Washington armament conference, passed the committee of the House of Commons.

A manifesto accusing the British Government of violating its pledges to the Arabs has been issued by the delegation in London.

Princess Mary and Viscount Lascelles opened their official social life at Chesterfield House with a dinner to the King and Queen.

Shell fire from a fort controlled by Chen Chung Ming, the United China leader, destroyed the munitions base of Sun Yat Sen, the deposed president of the Canton Government.

Arrested on a charge of manufacturing bombs, Filadelfa Castro, mayor of Lentini, Sicily, blew up the courthouse, killing all the occupants, says a despatch to Central News.

The treaty between Japan and China, negotiated at the Washington conference, providing for the return of Shantung to China, has been filed with the League of Nations.

## Royalty Discouraging Snobbery

## Encouraging Good Feeling Between Boys of Different Social Status

The Duke of York, second son of the King, is repeating this year the experiment he made last year for what has been called "the discouragement of Snobocracy." So thorough an understanding was then established between boys from Westminster School and boys from a Welsh steel works, following a football match, that a summer camp was set up by the Duke to encourage good feeling between boys of different social status. Two hundred public school boys with an equal number from congested and industrial areas were invited to share the camp.

## DEEP HOLLOW COUGHS ARE MIGHTY DANGEROUS

That same cough is everywhere you go, deep and hollow, why—because consumptive. First it was a cold, next came Catarrh, vitality decreased then the trouble was very serious. Never neglect a cold, not even a little one. Never trifle with sore throat or Catarrh. Get out your "Catarrh-zone Inhaler," breathe deeply into your lungs the healing soothing vapor of Catarrh-zone. Let Catarrh-zone clear out the nostrils. You'll wonder at the change when you use this healing remedy. It's really splendid for coughs, colds, bronchial irritation and Catarrhal trouble. Sold everywhere. Two months treatment \$1.00, small size 50c.

## Recovering Fuel

A new process is now in use for recovering fuel from cinders.

A hundred tons of coal used in a furnace leave about twenty tons of cinders, from which five tons of good coal fuel can be recovered by means of magnetism. The fuel contains sufficient iron to make it possible to extract it from the non-magnetic ash, and it is believed that millions of tons of fuel can be saved in this way.

As an experiment at the University of Wisconsin, cows are being fed sawdust treated with water.

## Quite Chic!

With her blue bird hat of milan and taffeta, she wears gauntlet gloves of heavy silk, with wrist straps, held in place by a buckle.

## MANY CHILDREN SICK, HOW TO TREAT THEM

The kiddies will get their feet wet, catch cold, get croup and give their mothers lots of trouble. With the first cough or sneeze, rub the little one's chest with Nerviline, rub it on plentifully. It can't harm. Then make a gargle with Nerviline and water, and have the child gargle for five minutes. Just at bed time, give the child ten drops of Nerviline in hot sweetened water. The result is fine, and next morning child is better. Nerviline is a great protection in the home. Large 35c bottles at all dealers.

Burns committed his poems to memory as he composed them, and when he sat down to write he had before him no labor of composition, but only the task of writing down what he had already finished.

## KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevents stomach and bowel troubles, or if the trouble comes suddenly—as it generally does—the Tablets will bring baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

## Circle Tours Through the Canadian Pacific Rockies

Delightful Trip Afforded for Tourists Over C.P.R.

By the most magnificent mountain and inland water trip in the world, passing through beautiful Banff, lovely Lake Louise, Field and Glacier thence to Arrowhead—steamer through the Arrow and Kootenay Lakes, winding in and out past majestic mountain peaks—touching at West Robson and Nelson enroute.

This delightful trip can be made in the opposite direction if desired and at remarkably low cost.

Any Canadian Pacific ticket agent will gladly give full information and arrange details.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

## SASKATCHEWAN WOMAN RECOVERS

Found Health by Taking Lydia E. Pinkham's Vegetable Compound

Melaval, Saskatchewan.—"I saw Lydia E. Pinkham's Vegetable Compound advertised for women's troubles and when a friend recommended it to me I tried it and it has done me so much good in the two years in which I have been taking it that I find I am a different woman since then. I recommend your Vegetable Compound as much as I can and you may use my letter as a testimonial."—Mrs. Wm. J. Thomas, Melaval, Saskatchewan.

These letters recommending Lydia E. Pinkham's Vegetable Compound ought to convince women of the great worth of this medicine in the treatment of ailments to which they are often subject.

Mrs. Thomas writes that she is a different woman now. If you are suffering from troubles women often have, or feel all run down, without any ambition or energy for your regular work, take Lydia E. Pinkham's Vegetable Compound. It is a natural restorative and should help you as it has Mrs. Thomas and many, many other women.

This medicine has been helping sick women nearly fifty years—surely a long record of service.

## Curiosity Insatiable

Mother.—You shouldn't eat your cake so quickly, Bobbie. I once knew a little boy who ate his cake so quickly that he died before he finished it.

Bobbie.—And what did they do with the rest of the cake, mother?

Had Your Iron Today?

## The Delicious Bread —of Energy and Iron

SERVE raisin bread twice weekly on your table for three reasons:

1. Flavor; 2. Energy; 3. Iron

You remember how good a generously filled, full-fruited raisin bread can be. Your grocer or baker can supply a loaf like this.

Insist—if he hasn't one he can get it for you.

Full-fruited bread is full of luscious seeded Sun-Maid raisins—rich in energizing nutrient in practically predigested form.

Raisins also furnish fatigue-resisting iron for the blood.

Serve plain raisin bread at dinner or as a tasty fruited breakfast toast with coffee.

Make delicious bread pudding with leftover slices. No need to waste a crumb of raisin bread.

Begin this week the habit of raisin bread twice weekly in your home, for raisin bread is both good and good for you.

## Sun-Maid Seeded Raisins

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.

Rockyford beat Carbon Baseball Team last Sunday by a score of 23 to 12.

### Big New Feature: Added To Colossus

Ringle Bros. and Barnum & Bailey  
Bring Entire Shipload Of  
Novelties From Europe

Made even more tremendous than in 1921 by the recent addition of many more trained wild animal displays and the purchase of Europe's biggest horse show, Ringle Brothers and Barnum & Bailey

combined will exhibit at Calgary Aug. 15th.

All who glance over the cab's news or who read the magazines must have noted the many contracts entered into by the Ringle Bros. for foreigner talent last winter. A special ship was chartered this spring to bring the hundreds of human performers, trained animal acts and equine displays to America. More than a million persons saw the mammoth new circus of 1922 during the week that it exhibited in Madison Square Garden, New York.

### Carbon vs Rockyford Carbon won, score 7-5

The feature of the game was Buffin's home run in the 5th inning with the bases full and another in the 6th inning with none on bases.

Rockyford people say it was the best game ever played on their diamond. Gibson pitched good ball all through the game and didn't walk a man.

Line up for Carbon:

Gibson	p
Hunter	c
Buffin	1 b
Tessier	2 b
Bushman	3 b
Lamely	s s
Engbrum	1 f
Hart	c f
Halstead	r f
